GT 340 Plant Hardiness Zones

HARDY CLIMBING VINES

Climbing vines add a vertical dimension to your garden and can be grown on existing walls or fences. Use an arbor or trellis to provide additional climbing space. They are also useful in hiding unsightly features such as covering rock piles. English Ivy, Boston Ivy, Virginia Creeper, Englemans Ivy and Climbing Hydrangeas are self-clinging. Other vines must be provided with a structure around which they can twine.

Key to Symbols

- ☀ requires full sun
- ☾ tolerates partial or light shade
- tolerates full shade
- () optimum height in brackets
- 🌿 native plant
- # product code

Ornamental Kiwi 🌿● #ACTKOAM

Actinidia kolomikta (6 m) Zone 4
 The male of the species is noted for striking pink, white and green variegated leaves. The female fruit-producing plant usually has some colouration but it is less pronounced. Variegation does not often show until the plant is 2 or 3 years old. Prefers light shade and will tolerate full shade, however leaf burn may occur in hot sun.

1 gal.....32.99

Fiveleaf Akebia 🌿● #AKEQU

Akebia quinata (9 m) Zone 5
 Vigorous semi-evergreen twining vine with attractive blue-green foliage. Small fragrant dangling purple flowers followed by sausage-shaped edible purple fruit.

1 gal.....15.99

Also available:

Silver Bells - white-pink flowers #AKEQUSB

1 gal.....15.99

Variegated Porcelain Vine 🌿● #AMPBREL

Ampelopsis brevipedunculata 'Elegans' (6 m) Zone 6
 Beautiful vine with green leaves variegated with white and pink. Showy inedible blue fruit. Seeks support with coiling tendrils on fence or trellis.

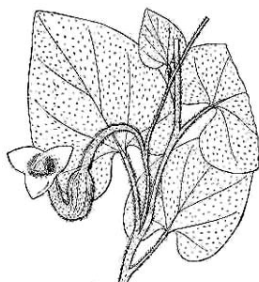

1 gal.....18.99

Dutchman's Pipe 🌿● #ARIDU

Aristolochia durior (10 m) Zone 5
 Vigorous twining vine with large heart-shaped deep green leaves. An old-fashioned vine, excellent for screening. Inconspicuous brown pipe-shaped flowers. Native.

1 gal.....14.99 2 gal.....19.99

Trumpet Vine 🌿● #CAMRA

Campsis radicans (10 m) Zone 5
 Fast growing vigorous colonizing native vine. Self-clinging but benefits from additional support. Trumpet-shaped orange-red flowers attract hummingbirds and Baltimore Orioles in summer. Tolerant of poor soils and salt. Ideal for screening or covering rock piles.

1 gal.....14.99

Varieties available:

Balboa Sunset red #CAMRABS
 2 gal.....22.99

Flava yellow #CAMRAFL
 1 gal.....11.99

Indian Summer apricot-orange #CAMRAIS
 1 gal.....16.99 2 gal.....23.99

Madame Galen salmon-red #CAMRAMG
 1 gal.....14.99 2 gal.....22.99

American Bittersweet 🌿● #CELSC

Celastrus scandens (4 m) Zone 3
 Vigorous native twining vine with dark green foliage becoming yellow in fall. Female plants produce inedible red-orange berries when pollinated by male plants.

1 gal.....15.99

Oriental Bittersweet 🌿● #CELOR

Celastrus orbiculatus (10 m) Zone 5
 Vigorous twining with glossy deep green foliage becoming yellow in fall. Female plants produce inedible yellow-orange fruit when pollinated by male plants. Adaptable to various soil conditions.

1 gal.....15.99

English (Baltic) Ivy 🌿● #HEDHEBA

Hedera helix 'Baltica' (5 m) Zone 3
 Valued for winter-persistent foliage and ability to thrive in deep shade. Also makes an excellent evergreen ground cover. As a vine it is self-clinging but needs a year or two to establish a good root system before it starts to climb. Also available in smaller sizes (see Ground Covers)

1 gal..(unstaked)..11.99 2 gal.....22.99

1 gal..(staked).....16.99

Climbing Hydrangea 🌿● #HYDANPE

Hydrangea anomala petiolaris (11 m) Zone 5
 Superb self-clinging vine for sun or shade. Fragrant white lace-cap flowers in summer. Handsome glossy dark green foliage and exfoliating bark. Best in moist well-drained soil.

1 gal.....14.99 5 gal.....59.99-79.99

2 gal.....19.99 7 gal.....119.99

Also available:

Mirranda #HYDANMI

variegated foliage with gold-chartreuse margins

1 gal.....24.99

Japanese Hydrangea Vine 🌿● #SCHHY

Schizophragma hydrangeoides (8-10 m) Zone 5
 Very attractive self-clinging vine for sun or shade. White lace-cap flowers in summer. Large heart-shaped dark green leaves.

Varieties available:

Moonlight #SCHHYMO

white flowers, silver-blue-green foliage

1 gal.....17.99

Roseum #SCHHYRO

pink-white flowers, dark green foliage

1 gal.....17.99

Climbing Honeysuckle 🌿●

Lonicera species (4-5 m) Zone 5
 Vigorous twining vines with showy trumpet-shaped flowers in summer. Blue-green foliage.

Varieties available:

Dropmore Scarlet #LONBRDS

scarlet-red flowers

1 gal.....14.99 2 gal.....22.99

Goldflame #LONHEGF

red-gold-pink flowers

1 gal.....14.99 2 gal.....22.99

Hall's #LONJAH

fragrant white-yellow flowers

1 gal.....14.99 2 gal.....22.99

Harlequin #LONPEHA

yellow-pink flowers, green leaves

edged with cream-pink

1 gal.....19.99

Mandarin #LONBRMA

red-orange flowers (Zone 3)

1 gal.....14.99 2 gal.....22.99

Virginia Creeper 🌿● #PARQU

Parthenocissus quinquefolia (18 m) Zone 2

Self-clinging, very vigorous native vine. Tough, versatile and adapts readily to almost any soil condition or exposure. Deep green foliage becoming brilliant red in fall. Inedible dark blue berries are attractive to birds. Salt tolerant. Ideal low maintenance vine.

1 gal.....12.99 2 gal.....21.99

Also available:

Engelmann's #PARQUEN

smaller leaves and improved clinging

ability

1 gal.....14.99 2 gal.....19.99

Star Showers #PARQUSS

green foliage with irregular creamy-white

variegation, tinged pink in fall.

1 gal.....24.99 5 gal.....99.99

2 gal.....29.99

CLIMBING VINES

Boston Ivy

Parthenocissus tricuspidata Veitchii' (8 m) Zone 4

Vigorous self-clinging vine with large lustrous dark green foliage becoming brightred in fall.

Tolerates wide variety of soil conditions and exposures. Inedible blue berries. Excellent vine for wall, trellis, screen or ground cover.

1 gal.....13.99 5 gal.....99.99
2 gal.....27.99

#PARTRIVE

Chinese Wisteria

Wisteria sinensis (5 m) Zone 4
Blooms before the leaves appear in spring. Flower clusters shorter than those of Japanese Wisteria, but make quite a show by opening nearly the full length of the cluster at one time. Slightly fragrant. Will bloom in shade.

2 gal.....27.99

Grafted Varieties:
(will flower at a younger age)

Alba white #WISSIAL
2 gal.....27.99

Black Dragon dark violet #WISSIBD
2 gal.....27.99 5 gal.....119.99

Blue Sapphire violet-blue #WISSIBS
2 gal.....27.99

Caroline lavender-mauve #WISSICA
2 gal.....59.99

Prolific violet-blue #WISSIPR
2 gal.....27.99

Silver Lace Vine

Polygonum aubertii (5 m) Zone 5
Twining woody vine that is vigorous and fast growing. Needs the support of a fence, trellis or arbor. Fleece-like fragrant white flowers are produced in summer. Tolerant of poor and dry soils.

1 gal.....14.99 2 gal.....21.99

#POLAU

Riverbank Grape

Vitis riparia (10 m) Zone 3
Native grapevine, also called Frost Grape for its late-ripening edible but sour-tasting fruit. Fragrant yellow-green flowers in June. Dense green foliage becoming yellow in fall.

2 gal.....19.99

#VITRI

Japanese Wisteria

Wisteria floribunda (8 m) Zone 4
Fragrant flowers in long clusters appear with leaves in spring. Flowers begin to open at top of cluster and gradually open toward bottom, prolonging bloom season but making less spectacular burst of colour than Chinese Wisteria.

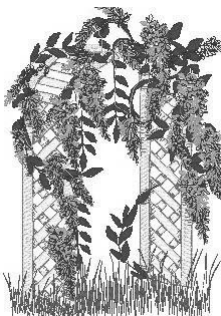

#WISFL

Grafted Varieties:
(will flower at a younger age)

Lavender Lace lavender-blue #WISFLL
2 gal.....59.99

Lawrence rich blue #WISFLAA
2 gal.....59.99

Pink Ice (Honbeni) soft pink #WISFLPI
5 gal.....119.99

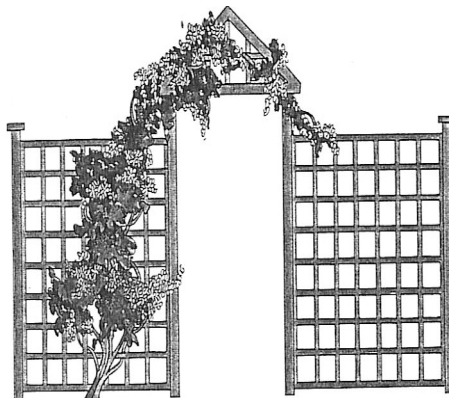

Blue Moon Kentucky Wisteria

Wisteria macrostachya 'Blue Moon' (5 m) Zone 4
Fragrant lavender-blue flowers up to 3 times per season if sited in full sun. One of the hardiest wisterias.

2 gal.....27.99
5 gal.....89.99

#WISMABM

COMBINING VINES FOR EXTRA COLOUR

For additional and prolonged colour in the garden, consider combining vines. For example, some clematis varieties will climb up through trees or scramble over the ground, covering up unsightly areas such as exposed rock. Clematis can also be grown together with climbing roses and the combined effect can be quite spectacular. Since both plants are available in wide ranges of colour, the possible combinations are numerous. For colour in winter, consider using evergreen euonymus varieties or English (Baltic) Ivy which will climb walls and structures.

CLEMATIS

THE QUEEN OF VINES

Clematis is a very popular climbing plant with a huge range of flower colours, shapes, patterns and sizes. Careful selection will allow you to have a clematis in bloom from spring through to autumn with flowers often followed by attractive seedheads. Clematis is easy to grow and requires very little maintenance once established. Remember to keep the root zone cool and moist. For further information pick up our Green Thumb Guide GT223 Clematis

We are pleased to offer many award winning new varieties from the renowned Raymond Evison Collection. Improved flowering, compact habit, dramatic colour and suitability for container culture or patio gardening are some of the features of this exciting new generation of clematis.

PLANTING CLEMATIS

Clematis roots prefer shade from direct sun and are most likely to thrive in cool moist well-drained soil. Plant in rich loam (such as Humber 3-in-1 Planting Mix) enriched with well-rotted compost, peat moss and two handfuls of bone meal.

Before planting, 'condition' the clematis by submerging it in its container in a bucket of water for at least 20 minutes so that the roots have had time to take up water. This is necessary because, once planted, the roots will take time to re-establish and be able to take up moisture.

Plant the root ball at an extra depth of 8 – 10 cm below the surrounding soil level. The clematis stems will need a firm support to the host structure (e.g. fence or trellis). Position the root ball so that the cane slopes towards the structure.

Clematis do not self-cling but climb by curling their leaf stems around a host structure. A chain-link fence or trellis is ideal. On a wall, strings or wires should be spaced every 25 cm in a grid and held away from the wall by 3 cm or more.
