Autumn Blaze Maple - *Acer x freemanii* 'Jeffersred'

Description:

Height/Width: 15 m (50 ft) x 12 m (40 ft) **Growth Rate:** 1 m (3 ft) per year **Zone:** 3
Sun: Best in full sun

Soil Conditions: Adaptable to an extremely wide range of climate and soil conditions

Autumn Blaze® Maple is known for its superior fall colour, excellent growth rate, a well-balanced branching habit, an oval to rounded crown. It combines the adaptability of a silver maple and the beauty of the red maple. It can be used in what are considered 'tough' sites, such as high clay content, wet or dry sites. The leaves resemble those of silver maple, being opposite, and simple, palmately lobed with toothed margins. The summer colour is a rich, medium green with excellent scarlet, orange and red fall colour that persists later than other maples. The Autumn Blaze® Maple makes an outstanding specimen tree, but can also be used in clusters or stands. It is best planted in well-drained, moist fertile soil. After planting, water deeply and apply mulch.

Lifetime Warranty

Congratulations on your purchase of an Autumn Blaze Maple - *Acer x freemanii* 'Jeffersred'

Description: Autumn Blaze® Maple is known for its superior fall color, excellent growth rate and is adaptable to an extremely wide range of climate and soil conditions. Autumn Blaze® Maple is a tree that has both the vigor and adaptability of the Silver Maple and the beauty and strength of the red maple. Under optimal conditions it can grow 1 m (3 feet) or more per year, eventually reaching 15 m (50 feet) tall and 12 m (40 feet) wide. The Red Maple parent contributes a well-balanced branching habit and the fall color. From the Silver Maple it inherited increased tolerance to drought and poor soil conditions. It can be used in what are considered 'tough' sites, such as high clay content, wet sites, dry sites and is hardy to Zone 3. The leaves resemble those of silver maple, being opposite, and simple, palmately lobed with toothed margins. The summer color is a rich, medium green with excellent scarlet, orange and red fall colour that persists later than other maples. This beautiful and adaptive tree, at maturity, will have an oval to rounded crown with strong ascending branches and a well-organized central leader. The Autumn Blaze® Maple makes an outstanding specimen tree, but can also be used in clusters or stands. It is best planted in full sun with well-drained, moist fertile soil. After planting, water deeply and apply mulch.

Any size/Any price – Your tree is guaranteed for value paid.

Conditions for Lifetime Warranty:

All of the terms and conditions of our regular 2 or 3-year guarantee apply. However, we will replace your original Autumn Blaze® Maple **once** should it '**ever**' die. (This guarantee does not apply to damage or death caused by natural disasters, extreme weather conditions, vandalism, negligence, acts of a person, animal, insect or incurable disease). If the tree was installed by Humber Nurseries and dies within 3 years of the date of installation, it will be replaced in the same hole, providing access remains the same, at no charge. After 3 years it would be replaced in a different location, unless the customer has the original tree or stump removed. Humber Nurseries is not responsible for tree or stump removal (to a depth of 30") after 3 years from date of purchase. If delivered, it would be redelivered to the same location at no charge, providing access remains the same. This warranty can be passed on should you move for any reason.
