HUMBER NURSERIES 2017 PRICE LIST

CLIMBING VINES & CLEMATIS

All Hardy Climbing Vines carry our 100% Two Year Guarantee, except where noted or when planted in containers. This guarantee is extended to three years when plant material is installed by Humber Nurseries Ltd.

For further information, visit www.humburnurseries.com for our Green Thumb Guides GT 223 Clematis, GT 316 Climbing Vines, GT 233 Tropical Vines, GT 302 Birds in Your Garden, GT 310 Shade Gardening, GT 340 Plant Hardiness Zones

PL 905
Effective March 1, 2017

Key to Symbols

- ☉ Requires full sun
- ☐ Tolerates partial or light shade
- Tolerates full shade
- () Optimum height or spread
- 🌿 Native plant
- # Product code

Ornamental Kiwi ☐● #ACTKOAM

Actinidia kolomikta (6 m) Zone 4
 The male of the species is noted for its striking pink, white and green variegated leaves. The female, fruit producing plant usually has some colouration but is less pronounced. Variegation does not often show until the plant is 2 or 3 years old. Prefers light shade and will tolerate full shade, however leaf burn may occur in hot sun.
 1 gal.....34.99

Fiveleaf Akebia ☉● #AKEQU

Akebia quinata (9 m) Zone 5
 Vigorous semi-evergreen twining vine with attractive blue-green foliage. Small fragrant dangling purple flowers followed by sausage-shaped edible purple fruit.
 1 gal.....19.99

Variety available:

Silver Bells #AKEQUSB

White-pink flowers
 2 gal.....22.99

Variegated ☉● #AMPBREL

Porcelain Vine

Ampelopsis brevipedunculata 'Elegans' (6 m) Zone 6
 Beautiful vine with green leaves variegated with white and pink. Showy inedible blue berries. Seeks support with coiling tendrils and is best for a fence or trellis.
 1 gal.....19.99

🌿Dutchman's Pipe ☉● #ARIDU

Aristolochia macrophylla (A. durior) (10 m) Zone 4
 Vigorous twining native vine. Large deep green foliage, ideal for screening. Inconspicuous pipe-shaped fragrant brown flowers. Fruit is an inedible capsule. Best in moist, well-drained soil.
 1 gal.....27.99

🌿Trumpet Vine ☉ #CAMRA

Campsis radicans (10 m) Zone 5
 Fast growing vigorous and colonizing native vine. Self-clinging but benefits from additional support. Trumpet-shaped orange-red flowers attract hummingbirds and Baltimore Orioles in summer. Tolerant of poor soils and salt. Ideal for screening or covering rock piles.
 1 gal.....19.99

Varieties available:

Flamenco #CAMRAFM

Red-orange flowers
 2 gal.....22.99

Flava #CAMRAFL

Yellow flowers
 1 gal.....17.99 2 gal.....22.99

Indian Summer #CAMRAIS

Apricot-orange flowers
 1 gal.....19.99 2 gal.....29.99

Madame Galen #CAMRAMG

Salmon-red flowers
 1 gal.....19.99

🌿American Bittersweet ☉● #CELSC

Celastrus scandens (4 m) Zone 3
 Vigorous native twining vine with dark green foliage turning yellow in fall. Female plants produce inedible red-orange berries when pollinated by male plants.
 1 gal.....19.99 2 gal.....29.99

Also available:

Autumn Revolution #CELSRAR

Self-pollinating variety with male and female flowers and inedible red-orange berries.
 2 gal.....29.99

Oriental Bittersweet ☉● #CELOR

Celastrus orbiculatus (10 m) Zone 5
 Vigorous twining vine with glossy deep green foliage turning yellow in fall. Female plants produce inedible yellow-orange fruit when pollinated by male plants. Adaptable to various soil conditions.
 2 gal.....27.99

For plant insurance use Nutrite Bonemeal 4-10-0

- Slow release, non-burning formula
- Ideal for transplanting all types of plants
- Encourages root development and healthy growth
- Enriched with calcium

English (Baltic) Ivy ☉● #HEDHEBA

Hedera helix 'Baltica' (5 m) Zone 3
 Valued for winter-persistent foliage and ability to thrive in deep shade. Also makes an excellent evergreen ground cover. As a vine it is self-clinging but needs a year or two to establish a good root system before it starts to climb. Also available in smaller sizes (see Ground Covers).
 1 gal...unstaked...12.99 2 gal.....22.99
 1 gal.....staked.....17.99

Also available:

Ivy Green #HEDHETHES

Screen (Thorndale)

An ivy screen grown in a wire planter with a coco fibre liner and trained on a wire trellis. Ideal for an 'instant' screen.

NO GUARANTEE OVER WINTER

Please contact Humber Nurseries for Availability, Sizes and Pricing

Climbing Hydrangea ☉● #HYDANPE

Hydrangea anomala petiolaris (11 m) Zone 5
 Superb self-clinging vine for sun or shade. Handsome glossy dark green foliage and exfoliating bark with fragrant white lace-cap flowers in summer. Best in moist, well-drained soil.
 1 gal.....17.99 5 gal...tripod.....64.99
 3 gal.....39.99 5 gal...staked.....169.99
 7-10 gal.....199.99

Also available:

Miranda #HYDANMI

Variegated green-gold foliage
NOT AVAILABLE FOR 2017

Climbing Honeysuckle ☉●

Lonicera species (4-5 m) Zone 5
 Vigorous twining vines with showy trumpet-shaped flowers in summer. Blue-green foliage.

Varieties available:

Candy Swirl #LONHBCS

Pink and Orange Flowers
 2 gal.....22.99

Dropmore Scarlet #LONBRDS

Scarlet-red flowers
 1 gal.....17.99

Goldflame #LONHEGF

Red-gold-pink flowers
 1 gal.....17.99 2 gal.....22.99

Hall's #LONJAHA

Fragrant white-yellow flowers
 1 gal.....17.99

Hall's Prolific #LONJAHP

Profuse fragrant yellow-white flowers
 2 gal.....22.99

Lonicera species (continued):

Harlequin #LONPEHA

Pink-purple flowers, variegated foliage
2 gal.....22.99

Kintzley's Ghost #LONREKG

Yellow flowers followed by large showy
silver-white braets
2 gal.....22.99

Mandarin #LONBRMA

Red-orange flowers (Zone 3)
1 gal.....17.99 2 gal.....22.99

Scentsation #LONPESC

Yellow flowers followed by red berries (Zone 4)
2 gal.....39.99

Virginia Creeper #PARQU

Parthenocissus quinquefolia (18 m) Zone 2

Self-clinging, very vigorous
native vine. Tough, versatile
and adapts readily to almost
any soil condition or exposure.
Deep green foliage turns
brilliant red in fall. Inedible
dark blue berries are attractive
to birds. Salt tolerant. Ideal low
maintenance vine.

1 gal.....17.99 2 gal.....29.99

Also available:

Engleman's #PARQUEN

Smaller leaves and improved clinging ability
1 gal.....17.99 2 gal.....29.99

Star Showers #PARQUSS

Green foliage with irregular creamy-white
variegation, tinged pink in fall
1 gal.....29.99

Yellow Wall (PW) #PARQUYW

Green foliage, golden-yellow in fall
2 gal.....39.99

Boston Ivy #PARTRVE

Parthenocissus tricuspidata 'Vetchii' (8 m) Zone 4

Vigorous self-clinging vine with large lustrous dark
green foliage turning bright red in fall. Tolerates
wide variety of soil conditions. Inedible blue berries.
Excellent vine for wall, trellis, screen or ground
cover.

1 gal.....21.99

Blue Crown #PASCABC

Passion Flower

Passiflora caerulea 'Blue Crown' (2-3 m) Zone 7

Twining vine with striking blue-white-yellow flowers
in summer. Dark green foliage. Small inedible
orange-yellow fruit in fall. May freeze to the ground
in cold winters but should regrow and flower the
following spring if mulched.

NO GUARANTEE OVER WINTER

Please contact our Tropical Department
for availability, size and pricing.

Silver Lace Vine #POLAU

Polygonum aubertii (5 m) Zone 5

Twining woody vine that is vigorous and fast
growing. Needs the support of a fence, trellis or
arbor. Fleece-like fragrant white flowers are
produced in summer. Tolerant of poor and dry soils.
1 gal.....17.99 2 gal.....22.99

Japanese Hydrangea Vine #SCHHY

Hydrangea Vine

Schizophragma hydrangeoides

(8-10 m) Zone 5

Very attractive self-clinging
vine for sun or shade.
White lace-cap flowers
in summer. Large heart-shaped
dark green leaves.

Varieties available:

Moonlight #SCHHYMO

White flowers, silver-blue-green foliage
1 gal.....29.99 2 gal.....49.99

Roseum #SCHHYRO

Pink-white flowers, dark green foliage
1 gal.....29.99 3 gal.....39.99

Riverbank Grape #VITRI

Vitis riparia (10 m) Zone 3

Native grapevine, also called Frost Grape for its late
-ripening edible but sour-tasting fruit. Fragrant
yellow-green flowers in June. Dense green foliage
turns yellow in fall.

NOT AVAILABLE FOR 2017

Summer Cascade (FE) #WISBRSC

Wisteria

Wisteria brachybotrys 'Betty Matthews'

(5-8 m) Zone 5

Deep lavender-blue flowers in late spring.
5 gal.....74.99

Japanese Wisteria #WISFL

Wisteria floribunda (8 m) Zone 4

Fragrant flowers in long clusters appear with leaves
in spring. Flowers begin to open at top of cluster
and gradually open toward bottom, prolonging
bloom season but making less spectacular burst of
colour than Chinese Wisteria.

Variety available:

Issai #WISFLIS

Lilac-blue flowers, light green foliage
1 gal.....26.99

Amethyst Falls #WISFRAF

American Wisteria

Wisteria frutescens 'Amethyst Falls' (3-4 m) Zone 6

Vigorous twining vine. Floriferous variety with
fragrant blue flowers in spring. Light green foliage
turns yellow in fall. Blooms at an early age on new
growth. Insect and disease resistant.

1 gal.....26.99

Aunt Dee #WISSIAD

Kentucky Wisteria

Wisteria macrostachya 'Aunt Dee' (8 m) Zone 4

Vigorous woody twining vine which requires a
strong structure for support. Slightly fragrant light
purple flowers in spring. Shade tolerant. Prefers
moist, well-drained soil.

1 gal.....26.99

Blue Moon #WISMABM

Kentucky Wisteria

Wisteria macrostachya 'Blue Moon' (5 m) Zone 4

Produces fragrant lavender-blue flowers up to 3
times per season if sited in full sun. One of the
hardest wisterias.

2 gal.....29.99 5 gal.....89.99

Chinese Wisteria #WISSI

Wisteria sinensis (5 m) Zone 4

Blooms before the leaves appear in spring. Flower
clusters shorter than those of Japanese Wisteria,
but make quite a show by opening nearly the full
length of the cluster at one time. Slightly fragrant.
Will bloom in shade. Fragrant, violet-blue-purple
flowers.

1 gal.....26.99

Varieties available:

White #WISSIAL

White flowers
1 gal.....26.99

Caroline #WISSICA

Lavender-mauve flowers
1 gal.....26.99

Visit our garden store for a large
selection of trellises and other creative
ideas for plant supports.

**COMBINING VINES FOR
EXTRA COLOUR**

For additional and
prolonged colour
in the garden,
consider combining
vines. For example,
some clematis
varieties will climb
up through trees or
scramble over the
ground, covering up
unsightly areas such
as exposed rock.
Clematis can also be
grown together with
climbing roses and
the combined effect
can be quite
spectacular.

Since both plants
are available in wide
ranges of colour, the possible combinations
are numerous. For colour in winter, consider
using evergreen euonymus varieties or
English (Balctic) Ivy which will climb walls
and structures.

Climbing Roses are considered among
the most spectacular of all climbing
plants. Available in a wide range of
colours and valuable for fragrance,
beautiful flowers and long blooming
periods.

For a complete selection,
see our Rose List (PL906).

CLEMATIS

THE QUEEN OF FLOWERING VINES

Clematis are a very popular climbing plant with a wide variety of flower colours, shapes, patterns and sizes. Careful selection will allow you to have a clematis in bloom from spring through to autumn with flowers often followed by attractive seedheads. Clematis are easy to grow and require very little maintenance once established. Remember to keep the root zone cool and moist. For further information pick up our Green Thumb Guide to Clematis (GT223).

We are pleased to offer many award winning new varieties from the world renowned Raymond Evison Collection (★). Improved flowering, compact habit, dramatic colour and suitability for container culture or patio gardening are some of the features of this exciting new generation of clematis. See varieties denoted ★.

PLANTING CLEMATIS

Clematis roots prefer shade from direct sun and are most likely to thrive in cool, moist, well-drained soil. Plant in rich loam (such as Humber 3-in-1 Planting Mix) enriched with well-rotted compost, peat moss and two handfuls of bone meal.

Before planting, condition the clematis by submerging it in its container in a bucket of water for at least 20 minutes so that the roots have time to take up water. This is necessary because, once planted, the roots will take time to re-establish and be able to take up moisture.

Plant the root ball at an extra depth of 8-10 cm below the surrounding soil level. The clematis stems will need a firm support to the host structure (e.g. fence or trellis). Position the root ball so that the cane slopes towards the structure.

Clematis do not self-cling but climb by curling their leaf stems around a host structure. A chain-link fence or trellis is ideal. On a wall, strings or wires should be spaced every 25 cm in a grid and held away from the wall by at least 3 cm.

Plant 8-10 cm deeper
