- ( ) Optimum height or spread
- 🍁 Native plant
- # Product code

### Fiveleaf Akebia ☉ ● #AKEQU

*Akebia quinata* (9 m) Zone 5  
Also known as chocolate vine. Vigorous semi-evergreen twining vine with attractive blue-green foliage. Small fragrant dangling purple flowers followed by sausage-shaped edible purple fruit.  
1 gal.....21.99

Variety available:  
**Silver Bells** #AKEQUSB  
White-pink flowers  
2 gal.....25.99

### Variegated ☉ ● #AMPBREL

#### Porcelain Vine

*Ampelopsis brevipedunculata* 'Elegans' (6 m) Zone 6  
Beautiful vine with green leaves variegated with white and pink. Showy inedible blue berries. Seeks support with coiling tendrils and is best for a fence or trellis.  
1 gal.....21.99

### 🍁 Dutchman's Pipe ☉ ● #ARIDU

*Aristolochia macrophylla* (A. durior) (10 m) Zone 4  
Vigorous twining native vine. Large deep green foliage, ideal for screening. Inconspicuous pipe-shaped fragrant brown flowers. Fruit is an inedible capsule. Best in moist, well-drained soil.  
1 gal.....29.99  
2 gal.....32.99

### 🍁 Trumpet Vine ☉ ● #CAMRA

*Campsis radicans* (10 m) Zone 5  
Fast growing vigorous and colonizing native vine. Self-clinging but benefits from additional support. Trumpet-shaped orange-red flowers attract hummingbirds and Baltimore Orioles in summer. Tolerant of poor soils and salt. Ideal for screening or covering rock piles.

1 gal.....21.99  
2 gal.....32.99

Varieties available:  
**Flamenco** #CAMRAFM  
Red-orange flowers  
2 gal.....24.99

**Flava** #CAMRAFL  
Yellow flowers  
1 gal.....21.99 2 gal.....24.99

**Indian Summer** #CAMRAIS  
Apricot-orange flowers  
1 gal.....21.99 2 gal.....32.99

**Madame Galen** #CAMRAMG  
Salmon-red flowers  
1 gal.....21.99

### 🍁 American Bittersweet ☉ ● #CELSC

*Celastrus scandens* (4 m) Zone 3  
Vigorous native twining vine with dark green foliage turning yellow in fall. Female plants produce inedible red-orange berries when pollinated by male plants.  
1 gal.....21.99

### English (Baltic) Ivy ☉ ● #HEDHEBA

*Hedera helix* 'Baltica' (5 m) Zone 3  
Valued for winter-persistent foliage and ability to thrive in deep shade. Also makes an excellent evergreen ground cover. As a vine it is self-clinging but needs a year or two to establish a good root system before it starts to climb. Also available in smaller sizes (see Ground Covers).  
1 gal...unstaked...14.99 2 gal.....24.99  
1 gal...staked.....19.99

Also available:  
**Ivy Green** #HEDHETHES  
**Screen (Thorndale)**

An ivy screen grown in a wire planter with a coco fibre liner and trained on a wire trellis. Ideal for an 'instant' screen.

**NO GUARANTEE OVER WINTER**  
Please contact Humber Nurseries for Availability, Sizes and Pricing

### Climbing Hydrangea ☉ ● #HYDANPE

*Hydrangea anomala petiolaris* (11 m) Zone 5  
Superb self-clinging vine for sun or shade. Handsome glossy dark green foliage and exfoliating bark with fragrant white lace-cap flowers in summer. Best in moist, well-drained soil.  
1 gal.....19.99 5 gal.....67.99  
3 gal.....42.99 10 gal.....219.99

### Climbing Honeysuckle ☉ ●

*Lonicera species* (4-5 m) Zone 5  
Vigorous twining vines with showy trumpet-shaped flowers in summer. Blue-green foliage.

Varieties available:  
**Candy Swirl** #LONHBCS  
Pink and Orange Flowers  
2 gal.....24.99

**Dropmore Scarlet** #LONBRDS  
Scarlet-red flowers  
1 gal.....21.99 2 gal.....32.99

**Goldflame** #LONHEGF  
Red-gold-pink flowers  
1 gal.....21.99 2 gal.....24.99

**Hall's** #LONJAHA  
Fragrant white-yellow flowers  
1 gal.....21.99

**Hall's Prolific** #LONJAPH  
Profuse fragrant yellow-white flowers  
2 gal.....24.99

**Harlequin** #LONPEHA  
Pink-purple flowers, variegated foliage  
2 gal.....24.99

**Mandarin** #LONBRMA  
Red-orange flowers (Zone 3)  
1 gal.....21.99 2 gal.....24.99

**Scentsation** #LONPESC  
Yellow flowers followed by red berries (Zone 4)  
2 gal.....44.99

### For plant insurance use Nutrite Bonemeal 4-10-0

- Slow release, non-burning formula
- Ideal for transplanting all types of plants
- Encourages root development and healthy growth
- Enriched with calcium

## Virginia Creeper

#PARQU

*Parthenocissus quinquefolia* (18 m) Zone 2

Self-clinging, very vigorous native vine. Tough, versatile and adapts readily to almost any soil condition or exposure. Deep green foliage turns brilliant red in fall. Inedible dark blue berries are attractive to birds. Salt tolerant. Ideal low maintenance vine.

2 gal.....32.99

Also available:

### Engleman's

#PARQUEN

Smaller leaves and improved clinging ability  
1 gal.....19.99 2 gal.....32.99

## Boston Ivy

#PARTRVE

*Parthenocissus tricuspidata* 'Vetchii' (8 m) Zone 4

Vigorous self-clinging vine with large lustrous dark green foliage turning bright red in fall. Tolerates wide variety of soil conditions. Inedible blue berries. Excellent vine for wall, trellis, screen or ground cover.

1 gal.....19.99 2 gal.....24.99

## Blue Crown

#PASCABC

### Passion Flower

*Passiflora caerulea* 'Blue Crown' (2-3 m) Zone 7

Twining vine with striking blue-white-yellow flowers in summer. Dark green foliage. Small inedible orange-yellow fruit in fall. May freeze to the ground in cold winters but should regrow and flower the following spring if mulched.

#### NO GUARANTEE OVER WINTER

Please contact our Tropical Department for availability, size and pricing.

## Silver Lace Vine

#POLAU

*Polygonum aubertii* (5 m) Zone 5

Twining woody vine that is vigorous and fast growing. Needs the support of a fence, trellis or arbor. Fleece-like fragrant white flowers are produced in summer. Tolerant of poor and dry soils.

1 gal.....21.99 2 gal.....24.99

## Japanese

#SCHHY

### Hydrangea Vine

*Schizophragma hydrangeoides*  
(8-10 m) Zone 5

Very attractive self-clinging vine for sun or shade. White lace-cap flowers in summer. Large heart-shaped dark green leaves.

Variety available:

### Roseum

#SCHHYRO

Pink-white flowers, dark green foliage

1 gal.....32.99 3 gal.....42.99  
5 gal.....67.99

## Summer Cascade (FE)

#WISBRSC

### Wisteria

*Wisteria brachybotrys* 'Betty Matthews'

(5-8 m) Zone 5

Deep lavender-blue flowers in late spring.

5 gal.....79.99  
100 cm.....10 gal.....144.99

## Japanese Wisteria

#WISFL

*Wisteria floribunda* (8 m) Zone 4

Fragrant flowers in long clusters appear with leaves in spring. Flowers begin to open at top of cluster and gradually open toward bottom, prolonging bloom season but making less spectacular burst of colour than Chinese Wisteria.

Variety available:

### Issai

#WISFLIS

Lilac-blue flowers, light green foliage  
1 gal.....29.99

## Amethyst Falls

#WISFRAF

### American Wisteria

*Wisteria frutescens* 'Amethyst Falls' (3-4 m) Zone 6

Vigorous twining vine. Floriferous variety with fragrant blue flowers in spring. Light green foliage turns yellow in fall. Blooms at an early age on new growth. Insect and disease resistant.

1 gal.....29.99 2 gal.....36.99

## Aunt Dee

#WISSIAD

### Kentucky Wisteria

*Wisteria macrostachya* 'Aunt Dee' (8 m) Zone 4

Vigorous woody twining vine which requires a strong structure for support. Slightly fragrant light purple flowers in spring. Shade tolerant. Prefers moist, well-drained soil.

1 gal.....36.99

## Blue Moon

#WISMABM

### Kentucky Wisteria

*Wisteria macrostachya* 'Blue Moon' (5 m) Zone 4

Produces fragrant lavender-blue flowers up to 3 times per season if sited in full sun. One of the hardest wisterias.

2 gal.....36.99 5 gal.....99.99

## Chinese Wisteria

#WISSI

*Wisteria sinensis* (5 m) Zone 4

Blooms before the leaves appear in spring. Flower clusters shorter than those of Japanese Wisteria, but make quite a show by opening nearly the full length of the cluster at one time. Slightly fragrant. Will bloom in shade. Fragrant, violet-blue-purple flowers.

1 gal.....29.99

Varieties available:

### White

#WISSIAL

White flowers

1 gal.....29.99

### Caroline

#WISSICA

Lavender-mauve flowers

1 gal.....29.99

## COMBINING VINES FOR EXTRA COLOUR

For additional and prolonged colour in the garden, consider combining vines. For example, some clematis varieties will climb up through trees or scramble over the ground, covering up unsightly areas such as exposed rock. Clematis can also be grown together with climbing roses and the combined effect can be quite spectacular.

Since both plants are available in wide ranges of colour, the possible combinations are numerous. For colour in winter, consider using evergreen euonymus varieties or English (Baltic) Ivy which will climb walls and structures.

Climbing Roses are considered among the most spectacular of all climbing plants.

Available in a wide range of colours and valuable for fragrance, beautiful flowers and long blooming periods.

For a complete selection, see our Rose List (PL906).

## OUR 'VIP' DISCOUNT PROGRAM

- On a single, one time purchase over \$1,000.00, 5% is automatically deducted off your bill.
- On a single, one time purchase over \$2,000.00, 10% is automatically deducted off your bill.
- On a single, one time purchase over \$3,000.00, 15% is automatically deducted off your bill.

# CLEMATIS

## THE QUEEN OF FLOWERING VINES

Clematis are a very popular climbing plant with a wide variety of flower colours, shapes, patterns and sizes. Careful selection will allow you to have a clematis in bloom from spring through to autumn with flowers often followed by attractive seedheads. Clematis are easy to grow and require very little maintenance once established. Remember to keep the root zone cool and moist. For further information pick up our Green Thumb Guide to Clematis (GT223).

We are pleased to offer many award winning new varieties from the world renowned Raymond Evison Collection (★). Improved flowering, compact habit, dramatic colour and suitability for container culture or patio gardening are some of the features of this exciting new generation of clematis. See varieties denoted ★.

🍁 <i>C. virginiana</i>	#CLEVI	White (3)	July-Oct	Optional	☀️🌑	4	2 gal 24.99

### PLANTING CLEMATIS

Clematis roots prefer shade from direct sun and are most likely to thrive in cool, moist, well-drained soil. Plant in rich loam (such as Humber 3-in-1 Planting Mix) enriched with well-rotted compost, peat moss and two handfuls of bone meal.

Before planting, condition the clematis by submerging it in its container in a bucket of water for at least 20 minutes so that the roots have time to take up water. This is necessary because, once planted, the roots will take time to re-establish and be able to take up moisture.

Plant the root ball at an extra depth of 8-10 cm below the surrounding soil level. The clematis stems will need a firm support to the host structure (e.g. fence or trellis). Position the root ball so that the cane slopes towards the structure.

Clematis do not self-cling but climb by curling their leaf stems around a host structure. A chain-link fence or trellis is ideal. On a wall, strings or wires should be spaced every 25 cm in a grid and held away from the wall by at least 3 cm.

Flat stones, mulch or small leafy plants

Plant 8-10 cm deeper
