- HST is extra
- Prices are conditional upon clear and unobstructed planting area and easy access to planting area
- V.I.P. discounts not applicable (already included)
- Loyalty 2% applies where applicable

HOW TO PLANT A CEDAR HEDGE

Dig a trench 40 cm wide and deep. Place plants branch to branch and backfill with Humber 3-in-1 Planting Mix and supplement with liberal amounts of Peat Moss. Cedars thrive on moisture and nutrient rich soils. Water thoroughly and fertilize with a liquid transplanter fertilizer weekly for the next 6-8 weeks. Prune back 15 cm of top growth immediately after planting and maintain height for first two years.

HOW TO CARE FOR YOUR CEDAR HEDGE

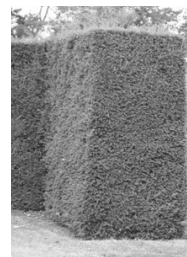

Fertilize with an evergreen fertilizer (e.g. 30-10-10) during the growing season. Keep well watered in dry weather—a soaker or drip hose is ideal for this purpose. Prune cedars to maintain a groomed appearance and fullness, slightly narrower on top, to allow even light penetration and prevent snowfall damage.

SOME SUGGESTED VARIETIES FOR SCREENING

DECIDUOUS

EVERGREEN

Beech	Spruce
Maple	Pine
Linden	Fir
Lilac	Hemlock
Ninebark	Yew
Serviceberry	Cedar
Viburnum	Juniper
Hornbeam	Euonymus

All (and more) available, from 60 cm - 300 cm
